

Family Home Visiting

Working together to build a secure foundation for babies and their families... All parents want the best for their children, and we know you are one of those parents! As you watch your child grow, our Healthy Families program provides the support and encouragement you need every step of the way.

The program is free, but rich in benefits.

Not only will you get the support during your pregnancy and early years of parenting, you will get ideas about how to care for and play with your baby. There will be information to let you know how your baby is growing and developing, and we will help you to create a safe and caring home for your child.

How do you get started?

We first want to learn about you, and we will come to your home at a convenient time to hear your story. From there, it's as easy as 1-2-3.

1. A Public Health Nurse will schedule an intake visit with you.
2. You will meet your family support specialist.
3. Visits will begin.

Visits will be held at your home and at a time just right for you and your family.

This unique program is free for qualifying participants. For more information about the Healthy Families program, contact your Hubbard County team at 218.255.1272
